

Level 1 CMMC Webinar with the Delaware PTAC.

CMMC stands for “Cybersecurity Maturity Model Certification”. The CMMC will encompass multiple maturity levels that ranges from “Basic Cybersecurity Hygiene” (Level 1) to “Advanced/Progressive” (Level 5). **The intent is to** incorporate CMMC into Defense Federal Acquisition Regulation Supplement (DFARS) and **use it as a requirement for contract award.**

We are pleased to introduce Project Spectrum - a Department of Defense Office of Small Business Programs’ initiative - to begin an interactive awareness training for the future CMMC requirements and their impact on your ability to continue government contracting.

The first 45-minute interactive training with the Project Spectrum staff covers seven of the notional CMMC domains, such as Access Control, Physical Protection, and System/Communications Protection. This training emphasizes how to guard against low-tech penetration methods.

Date: Tuesday, September 8, 2020 at 1:00 PM-2:00 PM (EDT), This is a free Webinar; however, you must register to participate.

To participate in the CMMC Level 1 Preparedness Training webinar please register at <https://projectspectrum.io/#!/eventRegistration/2241d080-4190-4055-9fbf-6346812717c9>.
